# Doctors Note

Dear Patients,

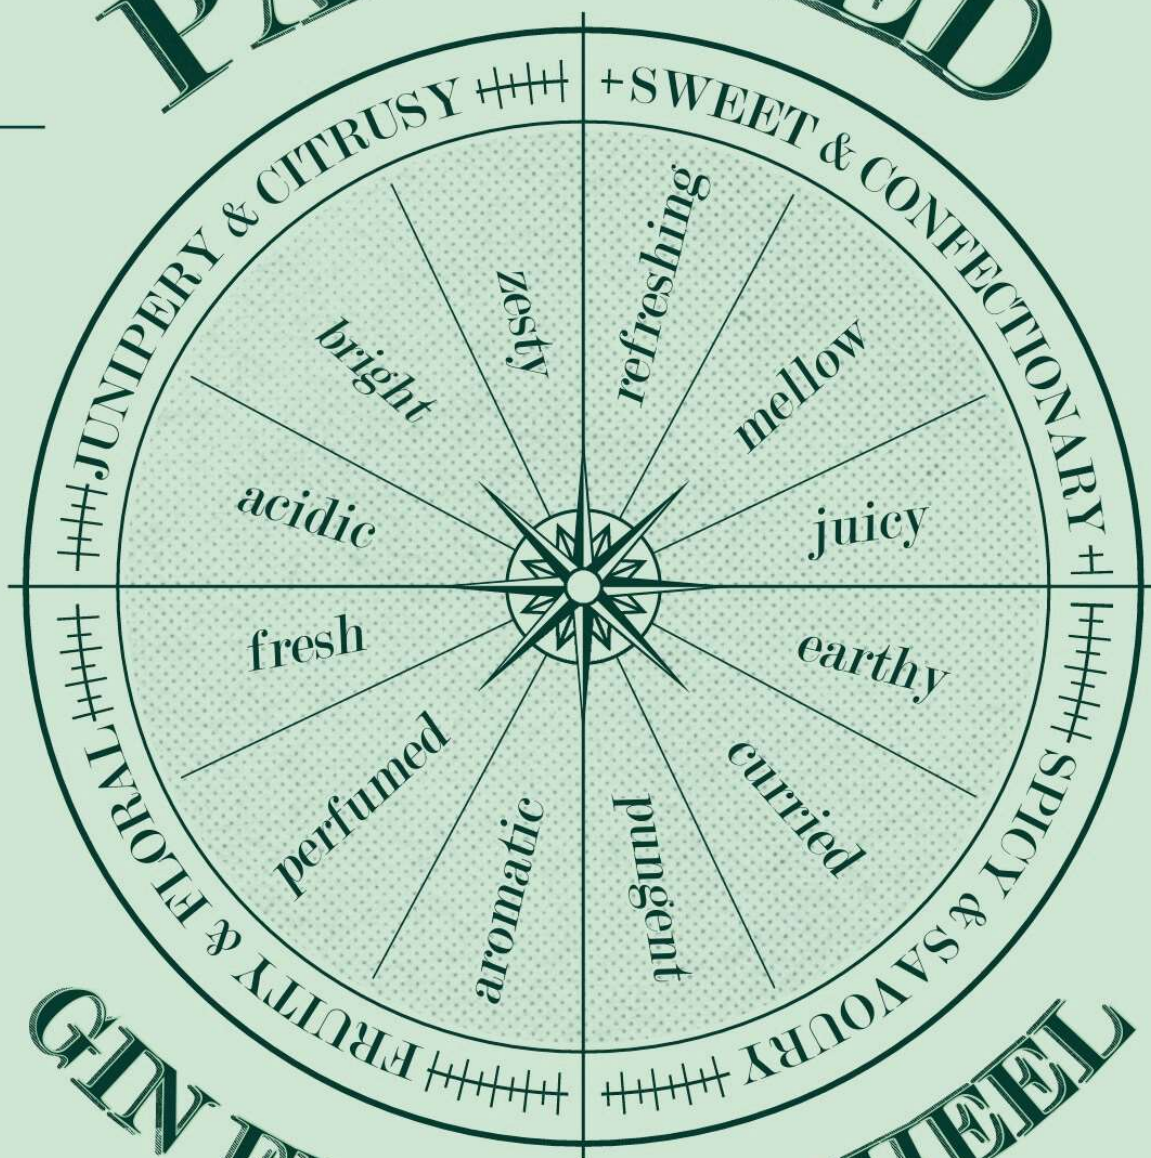

Gin is a culture as much as it is a medicine. The helix of its experience intertwines a history from its continental roots in South Asia and East Asia. Gin is not owned by any nation. Through its descent, it has picked up flavours and impressions along the way.

In the hands of my doctors, the pure juniper berry distillation becomes a malleable tool to medicate and treat ailments, curing you, dear patients with its botanical properties.

The journey of healing is now yours to walk.

**DOCTOR'S  
ORDERS**

---

After decades of research and scouring the globe in my youth, I have discovered that the truest path to healing a patient who suffers from either mental or physical symptoms is through gin remedies. Gin is the purest distillation of herbs & botanicals deriving from the predominant flavour of juniper berries. Pairing these potent concoctions with other freshly foraged ingredients create the perfect remedial cure for any ailment or stress-related palpitations.
